

Ontex is looking for a

Supply Chain Planning Business Analyst

Ontex is a fast growing international company where people are the most valuable asset. To reinforce our supply chain team we are looking for a Supply Chain Planning Business Analyst, reporting directly to the Supply Chain Team Lead.

Your role

As part of the Corporate Information Technology organization, the purpose of the SC IT Business Analyst position is to develop, support and maintain applications related to the Supply Chain Planning Business processes. You will be active in:

- Helping to design processes and the related organization needed to support the productivity of the business.
- Writing functional/technical specifications and conduct system configurations of the related SAP Modules to implement end-to-end demand planning processes (APO, SAP ECC,...).
- Analyzing and designing the required interfaces with other systems to ensure an 'end-to-end' support of the processes.
- Contributing to Supply Chain related projects ensuring quality assurance for the implementation of new solutions as defined in the blueprint respecting the project timings.
- Collecting and analyzing required 'change requests' from the key users and implementing the required changes in systems (as validated by the SC Change Advisory Board - CAB).
- Preparing and performing regular User Trainings and system usage improvements
- Providing second and third line support to the business community.
- Documenting processes and system's configuration for the business area under her/his responsibility

In doing so you will

- work in a global fast growing and demanding environment with a centralized SAP environment
- Understand advanced, integrated SC business processes to support the Supply Chain Planning business area
- Identify and recognize integration consequences with other core modules and applications used at Ontex.
- Ensure the Supply Chain solutions can operate 24x7 in more than 15 countries with the utmost efficiency and quality
- Have expertise of SAP core modules functionally and technically
- Analyze business requirements, write technical and functional specifications and test the new functionalities delivering a suitable and high quality solution
- Customize new set ups in the SAP APO Demand Planning environment
- Customize in the SAP Production Planning module.
- Have knowledge of SAP Materials Requirement Planning (MRP)
- Translate the business needs into SAP and SCM solutions by implementing standard SAP functionalities and judge on the impact of extra developments without losing the Ontex SAP template out of sight
- Test both standalone and integrated new system setup, document and support the solution
- Provide key user trainings and onsite assistance for the key- and business users during new Business Applications go-lives.

- Ensure consistency of the SAP data in accordance with the ITGC (IT General Controls) policies & procedures audited yearly by PwC
- Provide regular status updates to the Supply Chain Team lead
- Ensure continuous availability of the SAP APO-DP application for the various Ontex Supply Chain departments.

Your profile

- Engineer or Master degree, with Information Technology and/or Supply chain modules
- Strong analytical thinking
- Performance driven attitude
- Ability to convert business requirements into a technical design
- Team player with excellent communication skills
- Willing to work in a demanding international environment and flexibility to travel for international projects.
- Fluency in Dutch and English is a must
- Experience of in international company with an SAP environment is required
- Proficiency in Supply Chain processes in a CPG environment, especially the Supply Planning processes (Demand Management, S&OP,...)
- 5 – 8 years of hands-on experience with SAP-PP and APO-DP configuration & set up
- Knowledge of Arkieva is an asset
- Expertize of SAP environment related to Supply Chain business domain:
 - Customization experience of SAP SCM-APO-DP module
 - Hands on experience in APO BW design, Statistical models analysis and selection, Macro development, Demand aggregation and disaggregation, demand release to SAP ECC
 - Experience in setting up APO CIF and troubleshoot CIF issues
 - Good knowledge in statistical forecasting, data cleansing, CVC's creations
 - Strong working knowledge of BW cubes and SAP ECC master data and transaction data to support APO solution
 - Good knowledge of SAP ECC Production Planning, Demand Planning and Materials Requirements Planning modules and functionality

We offer you

- A professional environment ideal for your professional growth and career development
- A unique environment where local and international talents work and win together
- A fun working atmosphere where team spirit is the real deal
- Exciting and challenging projects with an international scope
- A competitive salary package
